

## ***ENVIRONMENTAL POLICY***

In line with our vision “Respecting the World, Respected Worldwide”, we comply with national and international regulations, legislations and other related environmental commitments. Pursuant to the Sustainable Development Goals, we carry out an environmental management system based on continuous improvement and protection of the environment in all our processes.

We perform our activities to;

- Leave a clean and healthy environment to the new generations,
- Use energy, raw materials and natural resources efficiently,
- Minimize and prevent the adverse environmental impacts at source through product life cycle,
- Prioritize climate change and sustainability in all activities,
- Raise environmental awareness of our employees, stakeholders and the society.

Within the above perspective, we strive to be a leader in our sector by managing our activities in an integrated manner with our sustainability approach within the framework of Environmental, Energy, Health & Safety, Quality and GHG Management Systems.

## ***WATER POLICY***

In line with our vision “Respecting the World, Respected Worldwide”, we integrate sustainability approach to all of our activities aligned with the Sustainable Development Goals.

As a global company operating throughout the world, we acknowledge water is an essential resource of life, and appreciate that our policy and actions regarding water, have a significant effect on employees, customers, and other communities.

In this context, respecting the human rights to water and sanitation, we are committed to;

- Perform our activities beyond regulatory compliance,
- Improve our water performance by focusing on reducing water consumption, increasing water efficiency, enhancing water monitoring and increasing water recycling & reuse in line with our water targets & goals,
- Minimize our water related environmental impacts throughout the product lifecycle by adopting innovative technologies,
- Raise environmental awareness of our employees, stakeholders and the society,
- Support water stewardship by collaborating with related stakeholders and participating in national & international water initiatives.

Within the above perspective, together with climate change and other environmental affairs we manage our activities by integrating Environmental, Energy, Health & Safety, Quality and GHG Management Systems.
