GLOBAL ENVIRONMENTAL POLICY

Within the framework of our vision of “Respecting the World, Respected the Worldwide” as Arçelik and its employees, our commitments regarding the continuous improvement of our environmental management system, and the protection of the environment to increase our environmental performance in all our processes in line with the principles of sustainable development and circular economy by the relevant national and international legal laws and regulations are as follows:

- Leave a clean and healthy environment to the future generations,
- Efficient use of natural resources in all processes,
- Prevention of environmental impacts and risks at the source of all our processes throughout the life cycle,
- Application of the circular economy approach,
- Prioritizing the sustainability approach and combating the climate crisis,
- Fulfilment of compliance obligations of legal requirements,
- Production of environmentally friendly products,
- Protection of natural ecosystem environments and biodiversity,
- To increase the environmental awareness of all our employees, stakeholders, and society.

With our above-mentioned principles, we work with all our strength to become a leading company in our sector by managing our activities in integration with our Quality, Energy, Occupational Health and Safety, Greenhouse Gas Management Systems, sustainability approach, and Global Business Ethics Principles.

1. COMPANY MANAGEMENT SYSTEM HANDBOOK

Detailed explanations regarding this Policy and its implementation can be found in the Company Management System Handbook.

2. DUTIES AND RESPONSIBILITIES

Environmental Policy is published under the coordination of Arçelik Environmental Management, reviewed and updated when necessary.

Duties and responsibilities regarding the implementation of the Environmental Policy are described in the Company Management System Handbook.

Violations of this Policy may result in various sanctions, including termination of employment.

The Revision Date: April 27, 2020
