Water Policy

WATER POLICY

In line with our vision “Respecting the World, Respected Worldwide”, we integrate sustainability approach to all of our activities aligned with the Sustainable Development Goals.

As a global company operating throughout the world, we acknowledge water is an essential resource of life, and appreciate that our policy and actions regarding water, have a significant effect on employees, customers, and other communities.

In this context, respecting the human rights to water and sanitation, we are committed to;

- Perform our activities beyond regulatory compliance,
- Improve our water performance by focusing on reducing water consumption, increasing water efficiency, enhancing water monitoring and increasing water recycling & reuse in line with our water targets & goals,
- Minimize our water related environmental impacts throughout the product lifecycle by adopting innovative technologies,
- Raise environmental awareness of our employees, stakeholders and the society,
- Provide water sanitation and hygiene, support water stewardship by collaborating with related stakeholders and participating in national & international water initiatives.

Within the above perspective, together with climate change and other environmental affairs we manage our activities by integrating Environmental, Energy, Health & Safety, Quality, GHG Management Systems, sustainability approach, and Global Business Ethics Principles.
