² This value includes not only other product segment such as air conditioners and small domestic appliances but also white good product segment.

Definition

Energy efficient products: It refers to the reduced environmental impact that results from the use phase of products. The coverage is products which consume less energy than the lowest "allowable" energy efficiency classes based on the available regulations in the specific countries. "Allowable" refers to the lowest energy class allowed in the market. It was calculated by considering products which have higher energy efficiency than the allowable class on the market.

Recycled or bio composite plastic materials used in products: It refers to improving the circularity of materials from the use of recycled materials. The coverage is products which include recycled plastics and/or bio composite materials
