Slowdown in Türkiye whereas Europe continues to recover, inorganic growth thanks to Europe and MENA transactions

Consolidated revenues grew by 9,3% y/y in real terms with the contribution of Europe and MENA transactions.

Weaker demand in Türkiye due to high-base effect whereas international demand remained weak except Africa, Bangladesh and Pakistan.

OPEX/Sales increased by 130 bps to 27,7% due to growing personnel, marketing & selling expenses after Europe and MENA transactions.

5,3% Adj. EBITDA margin due to lower gross margin and growing OPEX.

Net Working Capital/Sales ratio is 20,2% with further improvement compared to the previous period.

Higher leverage due to TRY depreciation and weaker EBITDA y/y

With the adjustment for the monetary gain on inventories, leverage would have been 4,06x.

Average Plastic Prices Index - Market

Source: ICIS - Chemical Industry News & Chemical Market Intelligence Index includes ABS, Polystyrene, Polyurethane, Polypropylene

 Plastic raw material prices slightly decreased y/y and remained flattish quarterly. Weak demand, slowdown in growth and low-capacity utilization in production have caused a significant decrease in prices in the last quarters. Yearly average prices expected to decrease slightly in the next quarters.

Metal raw material prices slightly decreased both y/y and compared to last quarter mostly due to weaker global demand, lower energy costs and ample capacity. Prices are expected to rise gradually in the upcoming quarters; and yet yearly average price for 2025 is expected to remain below the level of 2024.
